- Full compatibility with common large format printers
- Ultrafast viewer with tools for post-scanning tasks
- Feature extraction screen for creating, editing and downloading filters for classified scanning
- Scan to PDF format
- Scan to network, also across the Internet

SCANNER OPERATING SOFTWARE

WIDEimage^{NET} is a fully integrated scanning, viewing, converting and printing system for IDEAL/Contex color and monochrome scanners. Its Ultra-fast scan-to-disk capabilities make it the perfect link between your IDEAL/Contex scanner and popular software for graphics, reprographics, GIS, CAD, DTP and Archival.

With WIDEimage^{NET} software, companies can now share one or more scanners across its departments no matter their locations. The Scan-to-network feature enables you to send scans directly to specific computers set up to receive the image data. This powerful feature lets you distribute and save images directly through your network and through the Internet.

Runs with Windows 98, 98SE, ME, 2000, XP

WHEN SOLUTIONS MATTER

A Webinar is a great way to see a product in action from the convenience of your PC. Arrange a one-on-one Webinar Demo today by e-mailing sales@ideal.com or calling IDEAL at 1-888-524-3325.
